

Moisturizing formula to nourish and protect paws

The Ventilation Type is enhanced with invigorating vitamins

Rain Boot Type Features a sophisticated matte finish

※Wearing size M

## All-Season, Everyday Protection

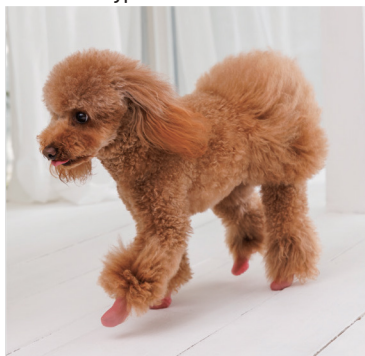

In the summer, protect your dog's paws from hot asphalt; in the winter, shield them from icy roads. These boots ensure full protection for your dog's paws year-round.

With low irritation and high moisturizing effects, they are perfect for indoor paw care and preventing dryness. They also help protect floors from scratches, reduce noise from footsteps, and prevent licking of wounds.

## Choose the Right Type for Your Needs

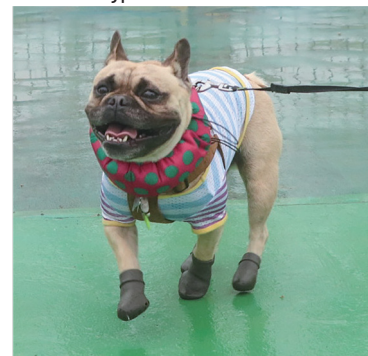

Two types available: the breathable vent-type for better airflow, and the rainboot-type, which is water-resistant. The vent-type features patented ventilation holes on the bottom, allowing air to circulate with every step, preventing moisture buildup. The rainboot-type is water-resistant, making cleanup easier after rainy day walks.

Ventilation Type

※Wearing size 3S

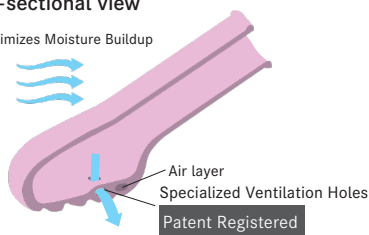

Rain Boot Type

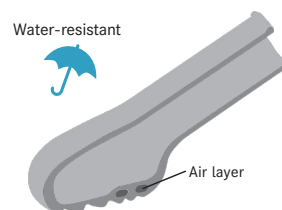

※Wearing size M on the front paws and size S on the hind paws

## Infused with Moisturizing Oil

Formulated with squalane oil derived from olive oil, providing excellent moisture. By simply wearing these boots on walks, you not only protect your dog's paws but also care for them naturally.

Patent Registered

### ■ Veterinarian's Comment

Pawtect helps prevent injuries during walks, as well as protecting against the heat of asphalt, frostbite in the snow, and other environmental hazards. On rainy days, when paw pads soften and become more prone to cuts, Pawtect helps protect them from sharp objects like glass or twigs. Additionally, the resin material makes them great for preventing slipping on indoor flooring as well. Though your dog may initially feel some discomfort due to the unfamiliarity, once they get used to it, Pawtect becomes a convenient tool that not only helps in preventing illness but also reduces the hassle of washing their paws after outdoor activities.

We have requested comments from veterinarians, which have been edited and published with their permission.

**Easy to put on, even for first-time users or when working alone**

## PAWTEC TOOL

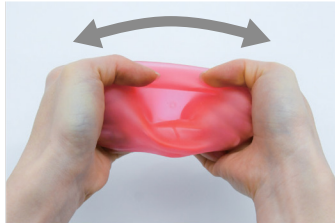

Tool for PAWTECT

JAN Code	Model
4989247641015	PAW-T

This is a special tool designed to make it easier to put on the Pawtect all-season boots. Simply fold the boot's shaft portion down and reverse it, then place it onto the tool's tip. Using the lever principle, the tool will open the boot wide, making it easy to slip on—even for first-time users or when you're putting it on by yourself.

### Snug Fit with Stretchable Material

Made from durable, soft, and stretchable elastomer material, these boots offer a perfect fit. The boots also feature a convenient strap that makes them easy to put on and take off.

### High Grip to Reduce Strain on Legs and Hips

The sole of the boot has a textured surface to provide excellent grip, preventing slipping on smooth floors like wood or tile, while also reducing strain on the legs and hips. These boots are especially suitable for senior dogs with weakened paw pad grip.

Set of 2 or Set of 4

● Material/Main body: Thermoplastic elastomer

Please hand wash with a mild detergent and lukewarm water.

Made in Japan

#### Reference Size

Size	A:Width	B:Height	C:ID	D:OL	Recommended Dog Breeds
3S	1.6-2.8cm	2.9-3.8cm	3.3-4.7cm	7.0-8.2cm	• Kaninhund Dachshund • Shih Tzu • Toy Poodle • Chihuahua • Papillon • Yorkshire Terrier • Pomeranian
SS	2.8-3.5cm	3.8-4.9cm	4.4-6.3cm	8.7-10.5cm	
S	3.5-4.3cm	4.9-5.6cm	5.7-7.9cm	10.2-12.0cm	• Miniature Dachshund • Jack Russell Terrier • Miniature Schnauzer
M	4.3-5.2cm	5.6-6.9cm	6.9-9.4cm	11.6-13.5cm	• Shiba Inu • Corgi • French Bulldog
L	5.2-6.1cm	6.9-8.0cm	8.0-11.6cm	13.1-15.5cm	• Labrador Retriever • Beagle, Border Collie

※ All measurements are for internal dimensions.

※ The recommended breeds above are for reference only. As individual differences exist even within the same breed, please select the appropriate size based on your actual measurements.

As this product is made from a stretchable material, if you are undecided regarding size, it is recommended to choose a smaller size.

※ Width refers to the widest part, and length is measured from the tip of the toes to the paw pads.

※ Please ensure the nails are trimmed short before use.

※ Using on rough or uneven surfaces such as gravel roads may result in damage to the boots.
